

# Shreyansh

*Full-Stack Developer • AI Automation Engineer*

shreyanshsingh1039@gmail.com • [github.com/Aryan](https://github.com/Aryan) • India

## PROFILE

---

Highly skilled and fast-learning full-stack developer with strong expertise in JavaScript, Python, and Java. Experienced in building modern, scalable systems across frontend, backend, API development, automation, and AI-powered solutions. Focused on clean architecture, high performance, and global-level product standards.

## SKILLS

---

**Languages:** JavaScript (ES6+), Python, Java

**Frontend:** React.js, Tailwind, Responsive UI/UX

**Backend:** Node.js, Express.js, REST APIs

**Databases:** MongoDB, Firebase

**AI / Automation:** Chatbots, LLM integration, automation pipelines

**Tools:** Git/GitHub, Linux, VS Code

## HIGH-DEMAND PROJECTS

---

### Advanced AI Assistant Platform

*Full-Stack*

- Developed a powerful AI system with voice + text interaction.
- Built memory system, token tracking, and scalable FastAPI backend.
- Designed clean UI and optimized for real-time usage.

### SaaS Dashboard Platform

*Full-Stack*

- Multi-user SaaS dashboard with admin panel and role management.
- Integrated subscription system and real-time analytics.
- High-performance interface with modern UX patterns.

### AI Automation Suite

*AI / Automation*

- GPT-powered email responder, report generator, and data pipelines.
- Business workflow automation to reduce manual tasks.
- Built scalable API workflows for continuous processing.

## EXPERIENCE

---

### Software Web Development Projects

Remote

2023 — Present  
*Independent*

- Built modern full-stack products combining frontend, backend, and automation.
- Implemented secure APIs, optimized performance, and improved UI experiences.
- Managed planning, testing, deployment, and product reliability.

## EDUCATION

---

### Class 12 Completed

India

Strong foundation in Computer Science, Mathematics, Logic Building, and Coding.

## STRENGTHS

---

Fast learner • Problem solver • Strong logic • Professional communication • Clean architecture  
• High-responsibility execution

## SERVICES (HIGH-DEMAND)

---

Full-stack applications • AI tools • Automation workflows • API integration • Dashboard systems • Code optimization

## LANGUAGES

---

English (Professional)
